

## **Slim Fit Program:**

Over the past year we have had a number of very successful overweight to obese animals join our "Slim Fit" weight loss program. Tanya, one of our very knowledgeable receptionists, has championed this program. Up until November 2007 these pets have lost a total of 84.98 kgs (186.97lbs).

The "Slim Fit" program is a prescription weight loss diet formulated by Waltham, a British Veterinary Company. Proper dietary information is tailored for your dog or cat through body condition scoring and a computer software program. This assists your pet in reaching their goal of a healthy weight loss of 1% - 3% per week for dogs, and 0.5% - 1.0% for cats. Once your pet has reached their goal weight they are then transferred onto a maintenance diet. If you have a cat or dog who would benefit from this program, give the hospital a call. The only cost for this program is the food itself. Set up, monitoring and reevaluations every 3 weeks and coaching are free. Our goal is to help you and your pet live healthier and happier!
